

## CdB Exploration Update

VDM Group Limited (**VDM**) advises that the exploration program for the Cachoeiras do Binga copper project located in the Republic of Angola (**CdB**) has experienced delays, mainly related to potential safety hazards identified at site.

VDM reports that the CdB partners are receiving excellent assistance and cooperation from the Government of Angola, exploration contractor Shandong Geo Mineral International, and technical services contractor SRK Consulting in addressing the situation. All parties remain committed to the project and to completing the exploration program.
